### DETOX PROJECT 2017 PROGRESS

In 2017, as in previous years, MABO's DETOX commitment was strategic in the performance of all production activities. Several internal investigations have been carried out with the involvement of our suppliers to advance in the path of eliminating hazardous chemicals in the textile supply chain and to improve waste management.

APEOs Elimination	<ul style="list-style-type: none"><li>● Investigation on the state of the APEOs elimination in our supply chain and our products</li><li>● Report publishing</li></ul>
PFCs Elimination	<ul style="list-style-type: none"><li>● Investigation on the use of PFCs (water/stain-proofing) in our supply chain and our products</li><li>● Report publishing</li></ul>
Hazardous Chemicals Elimination	<ul style="list-style-type: none"><li>● Test planning</li><li>● Supply chain Monitoring</li><li>● Report publishing</li></ul>
Extended Producer Responsibility	<ul style="list-style-type: none"><li>● Analysis of the potential economic value of our waste and on closed loops management</li><li>● Report publishing</li></ul>

Efforts will continue in 2018, focusing mainly on the elimination of hazardous chemicals and on EPR-Extended Producer Responsibility and recycling.
